

Tiago Brachini

Senior IT Auditor / IT Audit Specialist | IT Risk & SOX ITGC | Cloud (AWS, GCP) | AI-enabled audit

São Paulo, Brazil (UTC-3) · Open to remote roles worldwide · tvobrachini@gmail.com · linkedin.com/in/tvobrachini · tvobrachini.github.io · github.com/tvobrachini

SUMMARY

IT auditor with 10+ years across Big Four (PwC) and three publicly listed fintechs (Nubank, MercadoLibre, StoneCo). Specialised in IT general controls, SOX, SDLC governance and cloud security (AWS, GCP). Builds data and AI tooling for audit, from Python/Scala analytics to open-source multi-agent audit automation with human review at each stage.

EXPERIENCE

Nubank

Nu Holdings (NYSE: NU) · 140M+ customers (Brazil, Mexico, Colombia) · US launch Sep 2026 · São Paulo

Global IT Audit Specialist, Sep 2025 – Present

IT Internal Auditor, Mar 2023 – Sep 2025

- Plan and lead IT and security audits of SDLC governance and cloud environments (AWS, GCP), evaluating IT general controls and risk-and-control matrices.
- Automate audit testing and data analysis with Databricks and Scala; drive AI-assisted audit documentation and control testing.

MercadoLibre

NASDAQ: MELI · Latin America's largest e-commerce and fintech, 18 countries · Osasco

IT Internal Auditor, Nov 2021 – Mar 2023

- Designed and ran technical and operational SOX audits, including ITGC and cloud security reviews, across Latin America.
- Led regional audit projects with multinational teams.
- Built automated audit analytics in Python (Pandas) and BigQuery for high-volume environments.

StoneCo

NASDAQ: STNE · 1.7M+ merchant clients (2021) · São Paulo

IT Internal Auditor, Feb 2021 – Nov 2021

- Ran SOX IT and operational audits of payment, antifraud and core financial applications, including PCI DSS-relevant environments.
- Automated control testing with ACL, Python and BigQuery.

PwC Brazil

Risk Assurance · São Paulo

Senior Associate, Jul 2018 – Feb 2021

Experienced Associate, Jul 2017 – Jul 2018

Associate, Jul 2016 – Jul 2017

Trainee, Jul 2015 – Jul 2016

- Planned and ran IT and business process audits (ITGC, SOX/ICFR) for major financial institutions and other clients.
- Built process flowcharts and risk-and-control matrices; tested control design and operating effectiveness.
- Coordinated audit teams; documented findings, recommendations and completion reports.

Earlier (2009–2015): software development in PHP, ASP.NET/C# and Django (Tmax, 3Wise Tecnologia, OSG Sulamericana); IFSP research internship on the semantic web.

OPEN-SOURCE PROJECTS (PERSONAL)

- **GRC Audit Swarm** (Python, CrewAI): multi-agent audit platform across Planning, Fieldwork and Reporting, with QA agents that reject and retry, human approval between phases, read-only AWS evidence collection (boto3), a SHA-256-hashed evidence vault and AWS account-ID redaction. github.com/tvobrachini/grc-audit-swarm

- **SCF Auto-Crosswalker** (Python, LLM): maps IT policies and AWS Security Hub findings to Secure Controls Framework control IDs, for human review. CI with ruff and bandit. github.com/tvobrachini/scf-auto-crosswalker

EDUCATION

- Tecnólogo (undergraduate technology degree) in IT Management, FATEC Bragança Paulista, 2012
- Science Without Borders exchange program, Computer Science, Trinity College Dublin, 2013–2014

TRAINING

AWS Cloud Audit Academy – Cloud Agnostic (2021)

PUBLICATION

Impact of systemic management on project development: a study in a software house (ResearchGate)
