

Tiago Brachini

Senior IT Auditor / IT Audit Specialist | SOX 404 ITGC & Cloud Security (AWS, GCP) | Audit Automation (Python, SQL)

São Paulo, Brazil · Full Remote (UTC-3) · +55 11 99503-8709 · tvobrachini@gmail.com · linkedin.com/in/tvobrachini · tvobrachini.github.io · github.com/tvobrachini

SUMMARY

IT audit leader and practitioner with 10+ years of experience across Big Four (PwC) and leading publicly-traded fintechs (Nubank, Mercado Libre, StoneCo). Specialised in SOX 404 IT general controls (ITGC), SDLC governance, cloud security (AWS, GCP), and SOC 1/2 reliance. Experienced in evaluating BACEN regulatory compliance, Third-Party Risk (TPRM), and BCP/DR across high-transaction distributed systems. Builds production data analytics and AI tooling for audit, from SQL and Databricks/Scala pipelines to open-source multi-agent audit automation frameworks.

EXPERIENCE

Nubank (NYSE: NU) — 139M customers in Brazil, Mexico and Colombia · São Paulo

Global IT Audit Specialist, Sep 2025 – Present

IT Internal Auditor, Mar 2023 – Sep 2025

- Plan and lead enterprise IT and cloud security audits (AWS, GCP) across core banking, distributed microservices, and SDLC governance; design and execute risk-and-control matrices (RACM) for SOX 404 compliance.
- Execute full-population automated control testing and audit analytics using Databricks, Scala, Python, and SQL, expanding testing coverage over legacy sampling methods.
- Evaluate compliance against BACEN regulations (cybersecurity & operational resilience), Third-Party Risk Management (TPRM), and SOC 1 / SOC 2 Type II vendor reports.
- Drive AI-assisted audit workflows for workpaper documentation and control testing; present audit results, deficiency remediation roadmaps, and risk trends to senior leadership and Audit Committee stakeholders.

Mercado Libre (NASDAQ: MELI) — Latin America's largest e-commerce and fintech, 18 countries · Osasco

IT Internal Auditor, Nov 2021 – Mar 2023

- Designed and executed regional SOX 404 ITGC and operational audits across Latin America, covering logical access, change management, computer operations, and cloud security (AWS/GCP).
- Built automated audit analytics and extraction scripts in Python (Pandas) and SQL (BigQuery) for full-population testing across high-volume transaction databases.
- Assessed third-party vendor risks via SOC 1 / SOC 2 reports and supported BCP/DR testing for critical regional financial and e-commerce platforms.
- Led cross-border IT audit engagements with multinational engineering and risk teams.

StoneCo (NASDAQ: STNE) — 1.7M+ merchant clients · São Paulo

IT Internal Auditor, Feb 2021 – Nov 2021

- Executed SOX 404 IT and operational audits of payments processing, antifraud systems, and core financial ledgers, including PCI DSS-scoped infrastructure.
- Automated control testing, user access reviews, and anomaly detection using SQL, Python, and BigQuery.

PwC Brazil — Risk Assurance (Big 4) · São Paulo

Senior Associate 2018–2021 · Experienced Associate 2017–18 · Associate 2016–17 · Trainee 2015–16

- Planned and executed IT and business process audits (ITGC, SOX 404/ICFR, SOC 1/2) for tier-1 financial institutions and multinational corporations.
- Tested design and operating effectiveness of controls across ERP systems, relational databases (SQL, Oracle), operating systems, and automated business controls.
- Coordinated audit engagements, mentored associates, and drafted deficiency memos, recommendations, and executive reporting deliverables for client leadership.

Earlier (2009–2015): Software development in PHP, C#, ASP.NET, Python (Django) and Progress 4GL at Tmax, 3Wise Tecnologia and OSG Sulamericana (including updating OSG's J-SOX IT policy); semantic web research at IFSP and IT infrastructure support at Centro Paula Souza.

OPEN-SOURCE PROJECTS (PERSONAL)

- **GRC Audit Swarm** (Python, CrewAI): multi-agent audit platform across Planning, Fieldwork and Reporting, with QA agents that reject and retry, human approval between phases, read-only AWS evidence collection (boto3), a SHA-256-hashed evidence vault, AWS account-ID redaction and NIST OSCAL export.
github.com/tvobrachini/grc-audit-swarm
- **SCF Auto-Crosswalker** (Python, LLM): maps IT policies and AWS Security Hub findings to the Secure Controls Framework and on to ISO 27001, NIST, PCI DSS and SOC 2. CI with ruff, bandit and pip-audit.
github.com/tvobrachini/scf-auto-crosswalker

EDUCATION

- Tecnólogo in IT Management (Higher Education Technology Degree), FATEC Bragança Paulista, 2012
- Science Without Borders exchange program, Computer Science, Trinity College Dublin, 2013–2014
